# Umair Mubeen

**Laravel Developer / Django Developer**

Karachi, Pakistan

*Contact:* +92 3332482742 — *Email:* umair.mubeenir@gmail.com

## Profile

As a seasoned Software Engineer with a Five-year track record in web development, I bring expertise in PHP, Java, Python, and Android Studio for application development. In my current role as a Python Developer, I showcase not only technical proficiency but also a rapid learning aptitude, coupled with strong communication and interpersonal skills. My professional journey reflects a commitment to staying at the forefront of technology trends and delivering innovative solutions.

## Experience

**Python Developer** @ Net2Apps
*September 2019 – December 2021*

- Collaborating on the development of web applications with senior team members to ensure their robustness.

- Engaging in client consultations and meticulously documenting solutions through transparent code and visual aids like flowcharts.

- Spearheading the automation of SAP Website modules and SAAS System Configuration using cutting-edge Robotic Process Automation (RPA) Technologies.

- Demonstrating proficiency at the dynamic intersection of web development and AI-driven technologies.

**Android Developer / Web Developer** @ Agriculture Extension Department Hyderabad
*November 2018 – August 2019*

- Successfully developed web portals in PHP, emphasizing the implementation of Access Control Lists (ACL) for enhanced security and user access management.

- Engineered E-commerce applications using PHP, contributing to the creation of seamless and efficient online platforms.

- Innovatively designed and implemented Material Design-based applications on the Android platform, showcasing a user-centric approach to mobile application development.

- Demonstrated adeptness in web-based portal development, incorporating advanced Access Control Lists for enhanced security and tailored user permissions.

## Education

**Bachelor of Information Technology**
Mehran University of Engineering and Technology Jamshoro
*2015 – 2018*

**Secondary Education  College**
The Model College Old Campus Hyderabad
*2012 – 2014*

## Skills

**Languages:** Python, Java, PHP, HTML5, CSS, JavaScript, TypeScript
**Frameworks:** Flask, Django, Laravel, Bootstrap, Angular, Flutter, React Js
**Automation tool:** Selenium
**Databases:** MySQL, Oracle
**Tools:** Intellij Idea, Pycharm, Sublime, Android Studio, Vs Code

# Projects

- **SFCODEBOT:** Redefining & automating SAAS System Configuration with Robotic Process Automation (RPA) Technologies.

- **SFCODEBOT Website:** `https://www.sfcodebot.com/`

## Innovation in SAP SuccessFactors Documentation

### Powerful Administrative Tools

- Facilitates a documentation-first approach for SAP SuccessFactors modules.
- Streamlines processes, including testing, with an agile toolset.
- Enables easy navigation of complexity, allowing teams to focus on critical business aspects.

### Mechanized System Updates

- Builds and updates SAP SuccessFactors directly from a detailed workbook.
- Enables standing up a new instance, migrating software updates between instances, and managing enhancements.
- Empowers users to design system updates, with CodeBot executing the implementation.

### Optimized Security and Governance

- Establishes and maintains historical documentation for system instances.
- Audits roles and permissions for enhanced security and governance.
- Supports HR and IT processes by providing an extra layer of security and clarity.
- Provides comprehensive insights into modules and instances for improved control.

- **Voting App:** Developed a recent voting application focused on managing voting campaigns and polling stations across various cities. Implemented innovative features to enhance user engagement and streamline the voting process.

  - Designed a user-friendly interface for voters to easily navigate through the app.
  - Integrated real-time updates on voting statistics and results for improved transparency.
  - Implemented security measures to safeguard the integrity of the voting process.
  - Utilized advanced data analytics to generate insights into voter behavior and trends.
  - Collaborated with a cross-functional team to ensure the scalability and reliability of the application during peak voting periods.

# Soft Skills in Software/Web Development

- Problem-solving: Adept at identifying and solving complex problems in software and web development.

- Adaptability: Quick to adapt to new technologies and frameworks, ensuring up-to-date skill sets.

- Code Collaboration: Proficient in collaborative coding environments using version control systems.

- User-Centric Focus: Demonstrates a keen understanding of user experience and incorporates it into development processes.

- Attention to Detail: Pays meticulous attention to detail in coding, testing, and debugging phases.

- Continuous Learning: Committed to staying abreast of industry trends and continuously expanding technical knowledge.

- Agile Methodology: Familiarity with Agile development methodologies for efficient project management.

- Cross-functional Collaboration: Collaborates seamlessly with cross-functional teams, integrating diverse perspectives into projects.

- Code Review: Experience in conducting and participating in code reviews to ensure code quality and maintainability.

## References

Available upon request. Leveraging advanced technologies, I have cultivated strong professional relationships with industry experts, mentors, and colleagues. Should you require references, I am equipped to provide insights into my technical acumen, collaborative abilities, and overall work ethic through the valuable perspectives of those I have had the privilege of working alongside.
